

QUICK TIRE CARE CHECKLIST

6 Simple Steps for Pre-Departure Inspection

X	
	1. (Night before departure) Plug in TST Tire Pressure Monitoring System to top up its charge.
	2. (Morning of departure) Turn on TST - allow 5 minutes for sensors to update.
	3. Visually inspect tires for damage or wear. Look for - <ul style="list-style-type: none">• Cracks• Uneven tread wear• Embedded nails, screws, etc.
	4. Verify that you've got tire tools in the Airstream. These include - <ul style="list-style-type: none">• Complete Tire Changing Kit• Portable air compressor and extension cord• Levelling blocks
	5. Check tire pressures on TST. <ul style="list-style-type: none">• Top up any tires to "MAX PSI COLD" as indicated on the sidewall of the tires• Check tire pressure on the spare tire, with a gauge (if it's not equipped with a TST sensor)
	6. If any wheels have been removed in the last 100 miles, check lug nut torque with the torque wrench (included in the Tire Changing Kit).
